## Water

## ACROSS

4 Buchner funnel procedure.
6 Contains $75 \%$ of the earth's fresh water.
7 Moles of ions in one liter of $1 \mathrm{M} \mathrm{Fe}\left(\mathrm{NO}_{3}\right)_{3}$
11 Sulfur dioxide fate.
12 Ion on the upswing as pH rises.
14 Contains about 2.2 pounds of salt per cubic foot.
15 Water in Coke.
17 Number of moles in 1.8 kg of glucose.

## DOWN

1 Separation of components from a liquid mixture which depends on the differences in boiling points of the individual components.
2 Apple juice is one.
3 Water that can hold as much NaCl as it possibly can.
$5 \mathrm{Na}^{+}$or $\mathrm{Ba}^{+2}$
8 Can be used to remove volatile organics and pesticides from drinking water.
9 Its oxidation produces water.
10 Number of atoms in one molecule of $\mathrm{HNO}_{3}$

12 Water with high amounts of dissolved minerals.
13 What comes out of a water-tube boiler.
14 Number of grams in 1 ml of water.
15 Number of moles in 108 ml of drinking water.
16 Number of additional electrons required by an oxygen atom to become stable.
